Sperm Vision® Therio

for equine reproduction

Sperm Vision® Therio system pictured includes:
Sperm Vision® Therio software, Rapid Scan Digital Camera, Zeiss 20x Negative High Contrast objective and PC with integrated LCD Monitor.
Sold separately: Zeiss microscope and HT-2000 warming stage & controller

Sperm Vision® Therio offers the theriogenologist a highly efficient, flexible and sophisticated digital tool for evaluating sperm cells. Concentration, motility, morphology and viability* can all be accurately assessed, making Sperm Vision® Therio an essential tool for everything from donor evaluation to semen processing. The user interface is straight forward, easy to use and can be customized to suit individual needs. Sperm Vision® Therio ensures evaluation integrity of both new and archived records through a password protected multi-level operational system. These features and many more make Sperm Vision® Therio ideal for the serious reproductive specialist.

**Viability is optional*

Sperm Vision® Therio Reports

Clear and concise sample analysis, featuring donor data, charts, graphs and video images. Customized reports may be saved, printed or sent electronically.
